- Ideal secondary set with complete Loewe system functionality
- Full-HD panel with energy-saving LED backlight
- Integrated HDTV reception for DVB-T/C, retrofittable DVB-S tuner
- CI+ interface
- Mediaplayer function
- MovieVision playback via USB

Kronach. – With the Connect 26 LED, Loewe also integrates LED technology into the successful Connect product family. Beneath its award-winning exterior as conceived by Design3, it conceals a genuine powerhouse of functions. By virtue of its energy-saving Edge LED backlight technology, the Full-HD panel delivers razor-sharp images. Moreover, the hybrid tuner required for HDTV reception of digital, terrestrial and cable TV is already integrated. Loewe can also offer an upgrade for digital satellite reception on request. In addition, the Connect 26 LED Loewe Mediaplayer provides LAN Internet connection. The integrated CI+ interface guarantees the set is future-proof. Two HDMI interfaces are available to connect Blu-ray players and games consoles, making the new Loewe Connect 26 LED the perfect secondary set.

Whether on the desk, in the bedroom or in the dining room, the new compact Loewe Connect, with 2 x 10 watts of music power, ensures clear sound, with the option of switching to panorama mode. However, the stylish secondary set – also ideal for holiday homes or hotels – not only provides fantastic sound for films and music videos; its integrated DVB-T/C or S tuner means that radio programmes sound great too.

The Connect 26 LED is available for delivery in three attractive colour options. Whether High Gloss Black, High Gloss White or Chrome Silver, its stylish form looks at home in any interior. Included in delivery is a contemporary table stand in chrome. Alternatively, there is the sleek Floor Stand (C 22/26), or, optionally, the television can also be hung simply on the wall using a VESA mount.

Connect 26 Media can be networked throughout the home

As is the case for the large versions of the Loewe Connect with 32, 37 and 42 inch screen diagonals, all Connect 26 LED models come with an integrated Ethernet interface. In this way, the Network Mediaplayer available on the Connect 26 Media makes accessing music, digital photos and videos from the home network e.g. from a PC or network storage device ultra-convenient. The Ethernet connection also makes the flat screen TV the ideal convenient secondary set to operate with the Individual Mediacenter, Loewe's multiroom audio system.

What's more, the Connect 26 LED also features an easily-accessible side-mounted USB port which enables local MP3 music playback from USB memory sticks or USB hard drives, and the option of displaying JPEG digital photos. It goes without saying that photos can be scrolled through easily using the remote control or presented automatically as a digital slide show. Moreover, there's also the option of enjoying some MP3 tracks at the same time.
